

**NEW!**

## **Research Guides and Videos from Family History Expos, Inc.**

Family History Expos offers in-depth, hands-on research guidance in person, live over the Internet and through recorded classes.

Remember the old days when you had to travel in order to attend a big Expo away from home? And you had to choose between six great classes, all of which you really wanted to attend. And then, even when you attend the class, you couldn't take notes fast enough to retain all the valuable information.

Well, that was yesterday! Today, you can attend all the classes you want from the comfort of your own home...in your pajamas, if you wish. Plus, with a copy of the Research Guide and the video presentations on DVD which are available for each class, you can review the material over and over at your leisure.

Using both the printed Research Guide and viewing the recorded class presentations assures you will have the maximum benefit for skill building and successful research.
